

Merlin Gerin

250A Powerpact 4 Panelboard

The Powerpact 4 range is now extended to include a 250A panelboard with the introduction of 4 sizes at 250A and a range of 3 pole devices.

Features

- Ideal for industrial and commercial applications either as a main or a sub-distribution panel
- It has a 4 pole busbar system and a neutral bar, allowing 1, 2, 3 or 4 pole MCCB's and switch disconnectors to be fitted, providing a versatile circuit protection system for 1 pole + neutral, 2, 3 or 4 pole requirements
- Side mounted incomer with shroud giving IP2X finger safety on incoming connections
- Any combination of phases without loss of outgoing ways
- Removable top and bottom gland plates
- IP40 corrosion protective steel enclosure

Range

- 250A, with 5, 7, 9 and 13 triple pole outgoing ways
- The incomer is user fitted for maximum flexibility using the unique Powerpact 4 connection system for quick reliable connection

Powerpact 4 panelboards form part of a wide range of electrical distribution equipment from Merlin Gerin.
